

REDUCING YOUR ENVIRONMENTAL IMPACT

ENVIRONMENTAL MANAGEMENT SYSTEMS ISO 14001:2004

ISO 14001 is an international Standard that specifies a process for controlling and improving a company's environmental performance.

ISO 14001 consists of:

- General requirements
- Environmental policy
- Planning
- Implementation and operation
- Checking and corrective action
- Management review

This means that you:

- Identify elements of your business that impact on the environment and gain access to the relevant environmental legislation.
- Produce objectives for improvement and a management program to achieve them, with regular reviews for continual improvement.

ISO 14001 can also:

- Advertise your organisation's environmental credentials to the outside world
- Provide a valuable marketing edge given the increasing public awareness of environmental issues
- Ensure your organisation complies with legal requirements
- Identify impacts of business operations on the environment

THE BENEFITS OF ISO 14001:2004

The Environmental Management System Standard will:

- Help to identify and manage legal requirements
- Help to reduce costs.

An Environmental Management System is a means of ensuring that your organisation continually considers all aspects of its business operations that can either actually or potentially have an impact on the environment, primarily in terms of pollution.

The ISO 14001 Standard has many overlaps with ISO 9001 and as such it is relatively straightforward to integrate the two systems if you are already working to ISO 9001.

WHY NOT BOOK A PLACE ON OUR WORKSHOP? MAKING ENVIRONMENTAL PRACTICE PROFITABLE

This workshop will provide a detailed overview of the bottom line benefits that environmentally friendly practices can have in today's current economic climate. For a list of dates and venues and for further details, please visit:
